

We feel your pain

With hundreds of thousands of safe treatments, the **AVACEN 100** is the answer for many people who prefer a cost-effective, easy to use, drug-free alternative for temporary arthritis pain relief and muscular relaxation.

PAIN TREATMENT BENEFITS

- Non-Invasive
- Drug-Free
- Easy to Use
- Ideal for Home and Clinic
- Single Point Treatment
- Portable

ADVANCED TECHNOLOGY

- Custom Hand Sensor
- Adjustable Heat and Time
- Easy to Read LCD Screen
- Device Usage Monitor
- Patient Compliance Mode

AVACEN 100

What people are saying:

"I had knee surgery when I was 14. Now I'm 48 and I have terrible knees (I'm sure being a professional dancer didn't help!). So I started using the AVACEN 100 every night for only 10 minutes to see what would happen. Now I'm on the treadmill daily for 30 minutes with no problem. I even sprint the last few minutes!"
-Dawn F.

"It was very apparent to me after using the AVACEN 100 for two 30 minute sessions daily that I noticed it was taking away the arthritis in my lower back and in my right knee. It now provides me normal ease of motion in getting up from a chair as if I don't have any arthritis! I highly recommend this machine to anyone with these symptoms!" -Valerie C.

"My wife started using the AVACEN 100 twice a day for 10 minutes. Within a couple weeks the muscle spasms in her back began to diminish and were almost completely gone within a couple of months.."
-Bill M.

Introducing the
AVACEN 100

PATENTED AND FDA-CLEARED

AVACEN 100

AVACEN is an acronym for **A**dvanced **V**ascular **C**irculation **E**nhancement. The concept grew out of research to help those suffering from chronic migraines.

We found a thyroid treatment protocol that was raising core body temperature using T3 hormones which produced the unexpected benefit of migraine relief.

Thus began the quest to understand core body temperature manipulation. This led to published research describing a process of how putting the hand in a slight vacuum while applying heat to the palm could transfer that heat into the circulatory system, influencing core body temperature.

We later discovered that continuing to infuse heat into the circulatory system after the body reached normothermia (normal body temperature) produced some widespread and exciting results, which we patented.

ADVANCED HEAT THERAPY

Trying to understand why no one had previously made a similar discovery, we came to realize that except for the intentional creation of hyperthermia to treat cancer, the primary purpose for infusing heat into the circulatory system was to move hypothermic people to normothermia. Therefore, when the body reached normothermia, the job was done and there was no need for further warming.

Our patented **AVACEN** Treatment Method (ATM) continues infusing heat into the circulatory system at normothermia. The result: the body works to dissipate this unwanted infusion of heat by pumping warmed blood through deep tissue, to the heat exchange capillary network throughout the body. This increase in microvascular circulation results in significant benefits for arthritis and muscular relaxation.

Our **AVACEN 100** is a safe, patented, FDA-cleared Class II medical device that noninvasively uses clinically proven ATM.

The **AVACEN 100** is currently FDA-cleared as a heat therapy device for the temporary relief of minor muscle and joint pain and stiffness; the temporary relief of joint pain associated with arthritis, muscle spasms, minor strains and sprains; and muscular relaxation.

Simply place your hand in the **AVACEN 100** for a comfortable treatment session, usually 15 minutes.

It's the patented, drug-free alternative for temporary relief of pain.

Both the AVACEN 100 and AVACEN Treatment Method are protected by one or more of the following U.S. patents: 8,679,170; 9,066,781, international equivalents. Other patents pending.
